Emir Kaan Özver

Full-Stack Developer AI-first Engineer

- Full-Stack Developer at MINIMA
- Heusden-Zolder, Belgium

ozveremirkaan@gmail.com +32 489 89 72 81 emirkaan.be LinkedIn GitHub

[01] Profile

Full-stack developer at MINIMA, building web apps, mobile apps and SaaS from the interface down to the infrastructure. I care most about shipping: the architecture that fits the business, delivered on time, even when the deadline is tight. AI tools are part of my daily workflow, from planning to review.

[02] Experience

MINIMA, Full-Stack Developer — 05/2026 – Now

I build custom web and mobile applications and websites for clients, and work on MINIMA's own SaaS products and internal software.

ElaN Languages, Software Developer — 07/2022 – 02/2025

Helped build a new online e-learning platform: frontend interfaces, backend APIs and the database architecture behind them.

[03] Education

Hogeschool PXL, Bachelor in Applied Computer Science — 09/2022 – 02/2026

Professional bachelor's degree, specialising in application development. Projects across web, mobile and backend, including the team project OpenInzicht for Code4Belgium.

[04] Projects

Areca CMS, Creator & lead developer — Seirai, 2026

A build-time CMS for agencies that run many client websites.

- Hashed, immutable content snapshots with one-step rollback
- Content schemas defined in code, so clients can't break the structure

TypeScript, React, TanStack Start, PostgreSQL, Drizzle ORM, Tailwind CSS, Docker areca-demo.emirkaan-web.eu

CustomerJobHandler, Solo developer — 2025–2026

Job planning and reporting for a water-meter replacement crew.

- AI import that reads work-order screenshots and only keeps jobs it can read with certainty
- Asynchronous processing over RabbitMQ queues, with status tracking and retries

Next.js, React, Tailwind CSS, Java, Spring Boot, Spring AI, MySQL, RabbitMQ, Cloudflare R2, Docker

MyMedSchedule, Full-stack developer — 2026

A mobile diary for medication and schedules, with reminders.

- Medication schedules with timed reminders
- One codebase for iOS and Android with React Native and Expo

React Native, Expo, NativeWind, TypeScript github.com/ekozf/MyMedSchedule
